HANDBOOK OF INTERNATIONAL PUBLIC DATA NETWORKS

INPUT

About INPUT

INPUT provides planning information, analysis, and recommendations to managers and executives in the information processing industries. Through market research, technology forecasting, and competitive analysis, INPUT supports client management in making informed decisions.

Continuous-information advisory services, proprietary research/consulting, merger/acquisition assistance, and multiclient studies are provided to users and vendors of information systems and services (software, processing services, turnkey systems, systems integration, professional services, communications, systems/software maintenance and support).

Many of INPUT's professional staff members have more than 20 years' experience in their areas of specialization. Most have held senior management positions in operations, marketing, or planning. This expertise enables INPUT to supply practical solutions to complex business problems.

Formed as a privately held corporation in 1974, INPUT has become a leading international research and consulting firm. Clients include more than 100 of the world's largest and most technically advanced companies.

Introduction

A

Purpose and Scope

The international telecommunications environment is complex and dynamic. Changes in United States domestic regulations have introduced an increasing number of organizations that can provide international services.

Expansion of corporate activities overseas has increased the need for the exchange of information between facilities located throughout the world. At the same time, changes in regulations of some countries have led to more requirements to use national and international public data (packet) networks instead of leased circuits.

The *Handbook of International Public Data Networks* provides a single comprehensive source of information about access to international packet-switching services in more than 40 countries worldwide.

The handbook is a valuable reference for planning and operating international networks. It provides network managers and planners with the means to easily determine how to provide access to corporate or commercial databases from a remote location, provide access to worldwide electronic mail services, and assess the costs of international packet services as an alternative to private leased-line services.

B

Methodology

Information in the handbook is derived from numerous sources around the world. To obtain the information for each country, major international common carriers were contacted to obtain their published tariffs. In addition, national authorities (PTTs) were contacted to obtain the latest information about changes in tariffs or regulations regarding the use of their national or international public data networks.

© 1988 by INPUT. Reproduction Prohibited.

C

Organization

Besides the introduction, the handbook is organized into two major parts. The first part provides specific data about service availability, cost, operating requirements, and contacts for each country. The second part provides a summary of connect and traffic charges between the U.S. and selected frequently contacted countries.

Following the Introduction (Part I), Part II of the handbook provides comprehensive information about international public data network services for nearly 40 countries throughout the world. The information provided includes network name; access methods; transmission methods; installation, connect, and traffic information; and, where applicable, minimum charges. In addition, transborder data flow or privacy protection laws are identified, and specific contacts provided for each country.

Part III of the handbook provides a summary of connect and traffic charges between the U.S. and selected frequently contacted countries.

D

Related INPUT Reports

Information in the *Handbook of International Public Data Networks* is derived from research and publications related to INPUT's Multinational Network Planning Program. Information in the handbook can also be found in INPUT's Country Profiles—a series of publications providing extensive information about the telecommunications services, regulations, and tariffs throughout the world.

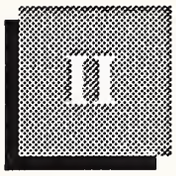
Country Network Profiles



Country Network Profiles

A

Profile Content and Use

The *Handbook of International Public Data Networks* is a valuable resource for telecommunications and data processing managers, planners, and analysts.

Information in Parts II and III can contribute significantly to the successful planning, implementation, and operation of international networks.

Part I of the handbook provides information about international public data network services of nearly 40 countries. For each country, the following information is provided.

- *Country Name* - The familiar country name is the name most often used to identify the country, but is sometimes not the name required for contracts or for polite business conversation. The proper name is the formal name of the country and is the name required for contracts in some countries and the name used in polite business conversation.

- *Country Profile* - Provides information about the location of the country and the area in square miles and square kilometers. Frequently, square kilometers are used. The capital is also identified.

- *Principal City(ies)* - Identifies major business cities in the country. Cities are identified because the principal cities are frequently the only cities from which access to public data networks can be obtained.

- *Primary Language(s)* - Identifies the primary language of the county. In some countries this language is required for contracts and contract negotiations.

© 1988 by INPUT. Reproduction Prohibited.

- *Telecommunications Authority* - Identifies the organization generally responsible for establishing regulations related to the use of telecommunications in the country. This organization may not be directly involved in providing the service, but has overall responsibility for rules, regulations, and tariffs.

- *Network Name* - Identifies the name of the international public data network. The name is necessary for obtaining information or ordering service. In some countries, the domestic network is the primary, if not the only, means for accessing international services. In these countries, the domestic network is identified.

- *Gateway City(ies)* - Identifies the city or cities from which dial (public and private) access can generally be obtained. Leased-line access can frequently be obtained from outside these areas, but there are additional charges.

- *Access Method(s)* - Identifies the common methods of accessing data network services. The common access methods are public dial, private dial, and leased line. One or all of the access methods may be available in the country.

  - *Public Dial* - Generally refers to the ability to access the network through a public switched telephone network (PSTN) from an asynchronous terminal.

  - *Private Dial* - Is generally the same type as public dial; however, a port is dedicated for use by the subscriber. A leased line may or may not be required for this type of service. In some countries, private dial may be referred to as leased line services.

  - *Leased Line* - Service generally implies network access through a dedicated synchronous terminal. In developed countries, this type of service is most commonly used for host-to-host connections using X.25 protocol. In some countries, leased-line service may be available for asynchronous service.

- *Transmission Method(s)* - Methods of transmission vary from country to country, but can be generally classified as: asynchronous, synchronous, or X.25. Where X.25 is available, CITT Recommendations are generally used as the standard.

- *Rates and Charges* - Rates and charges vary by country and sometimes by the international carrier providing the service. Rates and charges included in the handbook are representative of tariffs and costs applicable in the country. They are intended to indicate charges that could be incurred.

© 1988 by INPUT. Reproduction Prohibited.

- Rates and charges in this issue of the *Handbook of International Public Data Networks* are for common forms worldwide—dial access through domestic PSTN (Public Switched Telephone Network) services and through direct leased-line connections.

- Unless otherwise noted, rates and charges are shown in the currency of the country. Charges for access in a country are normally payable in the country, in the currency of the country. Some charges are shown in U.S. dollars or gold francs. When shown with these values, actual charges are payable in the currency of the country at the equivalent value of the country's currency at the time the invoice is paid.

- Although there is frequently an access charge, the costs are typically based on costs for local telephone service and vary by country and distance from the access point.

• *Contact(s)* - For each country, contacts are provided to make inquiries or initiate service. The information includes: organization, address, telephone and telex numbers when available.

Part II of the handbook provides a summary of connect and traffic charges between the U.S. and the countries. When Part II is combined with the data in Part I, planning estimates can be obtained for communications between the U.S. and foreign countries or between foreign countries.

B

Country Profiles

The Handbook of International Public Data Networks provides profiles of the public data network services for approximately forty countries throughout the world.

1. Argentina

Country Name - The proper name of the country is the Republic of Argentina.

Country Profile - The country is located on the southern tip of South America. The approximate size is 1,084,235 square miles (2,780,082 square kilometers). The capital is Buenos Aires.

Principal Cities - The principal cities are Bahia, Buenos Aires, Cordoba, and La Plata.

Primary Language(s) - The primary language is Spanish.

© 1988 by INPUT. Reproduction Prohibited.

Telecommunications Authority - The telecommunications authority in Argentina is Empresa Nacional de Telecommunications (ENTEL).

Network Name - The name of the international network is ENTEL.

Gateway City(ies) - The gateway city is Buenos Aires.

Access methods - Access methods include Public Dial (300 bps), Private Dial (100-300, 1200 bps), and Leased Line (2400-9600 bps).

Transmission Methods - Transmission methods include Asynchronous. X.25 is available for intracountry transmission only.

Currency(ies) - The national currency is the Australe.

Rates and Charges - Rates and charges are shown in Exhibit II-1. For Argentina, rates are stated in Gold Francs unless U.S. dollars are indicated.

EXHIBIT II-1

Installation	One-Time Charge 125.00 U.S. 3,000 (Leased Line)
Subscription	Charge per Month 30% surcharge for basic telephone 30.00 U.S. (2400 bps leased line) 44.76 U.S. (4800 bps leased line)
Connection	Charge per Hour 30.00
Traffic	Charge per Kilosegment 30.00
Minimum	None Specified

© 1988 by INPUT. Reproduction Prohibited.

Contact(s)

Empresa Nacional de Telecomunicaciones
Gerencia de Servicios Internacionales
Av de Mayo 761, 1st Floor
(1002) Buenos Aires
Argentina
Telephone: 541-499-0913
Telex: 390-18372 or 390-2251

Notes and Comments - Rates and charges change frequently. Direct contact should be made for specific, current information as required.

2. Australia

Country Name - The proper name of the country is the Commonwealth of Australia.

Country Profile - The country is a continent southeast of Asia. The approximate size is 2,967,870 square miles (square kilometers 7,686,848). The capital is Canberra.

Principal City(ies) - The principal cities are Brisbane, Canberra, Melbourne, and Sydney.

Primary Language - The primary language is English.

Telecommunications Authority - The telecommunications authority of international public data network services is the Overseas Telecommunications Authority (OTC).

Network Name - The name of the international network is MIDAS.

Gateway City(ies) - Sydney is the gateway city of international public data network services.

Access Method(s) - Access methods include Public Dial (110-300, 1200 bps), Private Dial (300, 1200 bps), Leased Line (2400-9600 bps).

Transmission Method(s) - Transmission methods include Asynchronous and X.25.

Currency(ies) - The currency is the Australian dollar.

Rates and Charges - Rates and charges are shown in Exhibit II-2. Unless otherwise noted, the charges are in the currency of the country.

Dial	12.00 (MIDAS and AUSTPAC)
Leased Line	11.00 (First 50 Kilosegments)
	9.00 (Next 100 Kilosegments)
	7.00 (Over 150 Kilosegments)
Minimum	6 Seconds and 10 Segments
	0.13 per-call access fee for AUSTPAC

Contact(s)

Overseas Telecommunications Commission
P.O. BOX 7000 GPO
Sydney 2001
Australia
Telephone: 612-230-5000
Telex: 790-20591

Notes and Comments

Rates shown are for direct connect to the Midas service. Lower rates apply for access through the domestic network (AUSTPAC).

Installation and subscription charges for leased-line services are for connection through AUSTPAC only.

© 1988 by INPUT. Reproduction Prohibited.

3. Austria

Country Name - The proper name is the Republic of Austria.

Country Profile - The country is located in central Europe. The approximate size is 32,703 square miles (83,853 square kilometers).

Principal Cities - The principal cities are Graz, Linz, Salzburg, and Vienna.

Primary Language(s) - The primary language is German.

Telecommunications Authority - The telecommunications authority is the Bundesministerium vur Verkehr Generaldetection für die Post und Telegraphenverwalfung.

Network Name - The name of the international network is Radaus Data Service.

Gateway City(ies) - The gateway city is Vienna.

Access Method(s) - Access methods include Public and Private Dial (50-300, 1200 bps) and Leased Line (1200 bps).

Transmission Method(s) - Transmission methods include Asynchronous, X.25, and Telex.

Currency(ies) - The currency of the country is the schilling.

Rates and Charges - Rates and charges are shown in Exhibit II-3. Unless otherwise noted, charges are in the currency of the country.

Minimum	None Specified

4. Bahrain

Country Name - The proper name of the country is the State of Bahrain.

Country Profile - The country is in the Arabian Gulf, midway between the Qatar peninsula and the east coast of Saudi Arabia. The approximate size is 258 square miles (662 square kilometers). The capital is Manama.

Principal City(ies) - The principal cities are Awali, Isa, Manama, and Sitra.

Primary Language(s) - The primary languages are Arabic and English.

© 1988 by INPUT. Reproduction Prohibited.

Telecommunications Authority - The telecommunications authority is the Ministry of Transportation and Telecommunications.

Network Name - The name of the international network is IDAS (International Database Access Service).

Gateway City(ies) - Gateway cities are Hong Kong and New York.

Access Method(s) - Access methods include Public and Private Dial (300-1200 bps) and Leased Line (2400-9600 bps).

Transmission Method(s) - Transmission methods include Asynchronous and X.25.

Currency(ies) - The currency is the Bahrain dinar.

Rates and Charges - Rates and charges are shown in Exhibit II-4. Unless otherwise noted, charges are in the currency of the country.

EXHIBIT II-4

Notes and Comments

Terminals may be rented from BTC or provided by the subscriber.

The monthly subscription charge varies, based on the number of NUI. The minimum and maximum are shown.

5. Belgium

Country Name - The proper name is the Kingdom of Belgium.

Country Profile - The country is located north of France in western Europe, on the North Sea. The size is approximately 11,903 square miles (30,521 square kilometers). The capital is Brussels.

Principal City(ies) - Principal cities include Antwerp, Brussels, Liège, and Malines.

Primary Language(s) - The primary languages are French, German, and Dutch.

Telecommunications Authority - The telecommunications authority for international public data network services is the Regie des Telegraphs et des Telephones.

Network Name - The name of the international network is DCS.

Gateway City(ies) - The gateway city for international public data network services is Brussels.

Access Method(s) - Access methods include Public and Private Dial (300-1200 bps) and Leased Line (2400-9600 bps and 48 Kbps).

Transmission Method(s) - Transmission methods include Asynchronous and X.25.

Currency(ies) - The currency of the country is the Belgian franc.

Rates and Charges - Rates and charges are shown in Exhibit II-5. Unless otherwise noted, the charges are in the currency of the country.

6. Brazil

Country Name - The proper name is the Federal Republic of Brazil.

Country Profile - The country is located on the Atlantic Coast of South America. The size is approximately 3,286,470 square miles (8,511,965 square kilometers). The capital is Brasilia.

Principal City(ies) - Principal cities are Belo Horizonte, Brasilia, Rio de Janeiro, and Sao Paulo.

Primary Language(s) - The primary language is Portuguese.

Telecommunications Authority - The telecommunications authority for international public data network services is the Ministerio de Communicacoes.

Network Name - The name of the international network is Interdata.

Gateway City(ies) - The gateway for international public data network services is Rio de Janeiro.

Access Method(s) - Access methods include Public and Private Dial (300-1200 bps) and Leased-line Service (300 bps).

Transmission Method(s) - Transmission methods are Asynchronous.

Currency(ies) - The currency of the country is the Cruzeiro.

Rates and charges - Rates and charges are shown in Exhibit II-6. In Brazil, charges are shown in gold francs.

Notes and Comments

A surcharge of 5% is added to all rates and charges shown.

Leased-line traffic and connection charges are applied after the minimum has been satisfied.

Terminals and modems must be obtained locally and cannot be imported. Dial terminal modems can be rented for approximately 30.00 per month.

© 1988 by INPUT. Reproduction Prohibited.

EXHIBIT II-6

Installation	None Specified
Subscription	Charge per Month 11,400 (300 bps, leased-line service) 14,490 (300 bps, leased-line service)
Connection	Charge per Minute 2.30 (Dial) 0.06 (Leased)
Traffic	Charge per Kilocharacter 3.80
Minimum	None Specified

7. Canada

Country Name - The proper name is the Commonwealth of Canada.

Country Profile - The country is located in North America. The approximate size is 3,851,787 square miles (9,976,139 square kilometers). The capital is Ottawa.

Principal City(ies) - Principal cities are Montreal, Ottawa, Quebec, Toronto, and Winnipeg.

Primary Language(s) - The primary languages are English and French.

Telecommunications Authority - The telecommunications authority is the Department of Communications.

Network Name - The name of the international network is DATAPAC.

Gateway City(ies) - There are gateways for international public data network services in most major cities.

Access Method(s) - Access methods include Public and Private Dial (110-300, 1200, and 2400 bps), Asynchronous Leased Line (110-30, 1200, and 2400 bps), and Synchronous Leased-line Service (2400-9600 bps and 19.2 Kbps).

© 1988 by INPUT. Reproduction Prohibited.

Transmission Method(s) - Transmission methods include Asynchronous, Synchronous, X.25, and SDLC.

Currency(ies) - The currency is the Canadian dollar.

Rates and Charges - Rates and charges are shown in Exhibit II-7. Rates and charges for Canada are in Canadian dollars.

EXHIBIT II-7

Installation	One-Time Charge

Notes and Comments

There are numerous alternatives available to meet a wide variety of customer needs. Included in the alternatives is the option to have all charges billed collect to a U.S. subscriber. The DATAPAC charges for collect connections are slightly less than those shown.

8. Chile

Country Name - The proper name is the Republic of Chile.

Country Profile - The country is located on the west coast of South America. The approximate size is 292,256 square miles (756,945 square kilometers). The capital is Santiago.

Principal City(ies) - Principal cities are Concepcion, Santiago, Valparaiso, and Vina del Mar.

Primary Language - The primary language is Spanish.

Telecommunications Authority - The telecommunications authority is the Subsecretaria de Telecommunicaciones.

Network Name - The name of the international network is ECOM.

Gateway City(ies) - The gateway city for international public data network services is Santiago.

Access Method(s) - Access methods include Public Dial (110-300 and 1200 bps) and Leased Line (100-300, 1200-9600 bps).

Transmission Method(s) - The transmission method is Asynchronous.

Currency(ies) - The currency of the country is the escudo.

Rates and Charges - Rates and charges are shown in Exhibit II-8. Rates and charges for Chile are shown in U.S. dollars.

U.S. Domestic to Foreign Services

III

U.S. Domestic to Foreign Services

A

Introduction

Access to public data networks from foreign countries involves the use of both foreign and U.S. domestic facilities and services. In addition to the rates and charges levied by the foreign services provider (Part II), U.S. domestic service providers levy a charge on use of the domestic portion of the network. Exhibit III-1 provides a summary of primary rates and charges levied by two major U.S. service providers.
